August 3, 2015

Farmingville, NY - On July 31, Supervisor Ed Romaine and Councilman Dan Panico toured Atlantic Industrial Technologies in Shirley. The company is in the final phase of manufacturing a large mobile hydraulic power system for the NASA Kennedy Space Center. This power supply will be utilized by NASA to simulate the forces experienced during lift-off for the new Space Launch System (SLS), the most technically advanced space vehicle ever built, which is replacing the retired Space Shuttle. Atlantic Industrial Technologies has a 30 year history on Long Island. They made a long term commitment to Brookhaven in 2009 by building their design and manufacturing facility in Shirley.
